EDUCATION

University of Michigan, Ann Arbor, MI
Master of Science in UX Research and Design, May 2027, **GPA 4.00**

Coursework: Advanced Interactive Design, Python, UX Principles, Generative Artificial Intelligence, Web Design and Accessibility, Advanced UX Research, Graphic Design, IoT and AR/VR

Spelman College, Atlanta, GA
Bachelor's of Arts in Psychology, *May 2017*

Skills/Tools: Claude, ChatGPT, Copilot, Gemini, Usability Studies, Interviews, Surveys, Personas, Journey Mapping, Prototyping, Affinity Mapping, Figma, Miro, Python, R, HTML, CSS and Adobe Photoshop

---

RESEARCH/PROJECT EXPERIENCE

United States Department of Agriculture, Remote
UX Researcher: *January 2026- April 2026*

- Lead usability testing with 10+ employees nationwide to identify interaction challenges and workflow inefficiencies.
- **Conduct user interviews with 15+ importers, brokers, and government officials to evaluate search functionality and mobile experience for the USDA's ACIR portal**
- Design and deploy surveys to assess findability and interpretive confidence across users
- Collaborate weekly with **4 USDA stakeholders to uncover usability pain points in navigation, search filters, and help resources**

Adobe Student Ambassador, Ann Arbor MI
Student Representative: *January 2026- Current*

- Collecting and **communicating student feedback to Adobe** to inform campus initiatives and improve student experiences.
- **Representing Adobe on campus** by promoting Adobe Creative Cloud and Adobe Express to diverse student communities.
- Planning and **hosting workshops, demos, and pop-up events** to increase student engagement and adoption of Adobe tools.
- Serving as a **peer resource**, providing guidance and support to students learning Adobe tools.

Milk & Froth Website Redesign
UX Designer: *January 2026- March 2026*

- Audited the brand's homepage, About, and Find Pints pages and ran a **competitive analysis of two local and two national ice cream brands across eight website features**, such as online ordering, search, and store locator.
- Built the brand's **design system from the ground up in Figma**, including color tokens, a type scale, buttons, and a component library, before designing any pages.
- Designed the **location, e-commerce, and 404 pages in Figma** and supported the rest of the site as one of two designers, delivering a **responsive redesign for desktop and mobile**.
- Mapped five pages in **Figma wireframes** with a shared header and footer and developed the **visual identity** for the brand.

Instructure, Ann Arbor, MI
UX Researcher: *August 2025-December 2025*

- Built the case for ElevateED through **UX research and AI-assisted prototyping in Figma Make**, proposing inclusive, alternative education pathways to support Instructure's expansion.
- Conducted **stakeholder interviews**, analyzed needs, and synthesized **qualitative data** to identify barriers in access, credentialing, and user experience for non-traditional learners.
- Collaborated cross-functionally with researchers, designers, and organization stakeholders to **develop prototypes, affinity walls, and actionable design recommendations presented to over 200 students/corporate employees.**
- **Presented final deliverables to all stakeholders**, including **high-fidelity wireframes**, to drive alignment with Instructure's long-term strategic goals amid the rapidly evolving EdTech landscape.

Google UX Designer Course, Remote,
UX Designer and Researcher: *July 2025-October 2025*

- Developed a scheduling application called the "Crowning Calendar" through a **comprehensive UX research and design process.**
- Designed and executed an **end-to-end UX research and design process** for a scheduling/calendar app.
- Conducted **10+ structured interviews** with consultants and clients across five states to identify key user pain points in time management and scheduling.

- Translated raw data into **user personas, journey maps, and affinity diagrams**, ensuring research-driven design outcomes.
- Developed and tested **low-fidelity wireframes and prototypes** in Figma, iterating based on usability feedback to improve task success rates.

WORK EXPERIENCE

Root Insurance, Remote
UX Research Intern: *June 2026- August 2026*

- Executed an **end-to-end mixed-methods research strategy across 18 sessions**, including **12 internal stakeholder interviews** and **6 competitor policyholder interviews** conducted via User Interviews and Lookback across key competitor cohorts.
- Evaluating Lookback session recordings via thematic coding and affinity mapping to create **high-fidelity Customer Journey Maps**, DIG-based personas, and a prioritized **Retention Levers Matrix**
- Delivered **three executive research readouts** to cross-functional stakeholders, including the **Director of Design and SVP of Product**, presenting research progress, emerging insights, and strategic recommendations to align leadership on retention opportunities and product direction.
- Translated research insights into **15 net-new retention concepts in Figma**, developing high-fidelity experience recommendations that addressed identified churn drivers and gave Product stakeholders tangible, research-backed opportunities for improving policyholder retention.
- Built a **centralized research repository** using **Claude Code's AI-powered development tools**, enabling teams across the company to access user insights and inform product decisions.

UK Digital Health Systems, Ann Arbor
UX Research Intern: *June 2026 - September 2026*

- Conduct qualitative coding and thematic analysis in **NVivo** for a mixed-methods health equity study spanning **48 patient and staff interviews (29 patient, 19 staff)** and insights from **130+ hours of ethnographic fieldwork examining** UK primary care delivery.
- Execute **Round 2 qualitative coding** of staff interviews and field notes using a standardized research protocol, identifying patterns related to **digital access, healthcare equity, patient experience, and "Remote by Default" primary care**.
- Perform **transcript verification and de-identification** across sensitive healthcare research data, strengthening **data accuracy, participant confidentiality, and research integrity** prior to formal analysis.
- Apply structured codebooks and qualitative coding frameworks across **2 primary research data sources, interviews and ethnographic field notes**, documenting coding decisions to improve consistency and reliability across researchers.
- Analyze evidence from a **48-interview research corpus** to surface barriers and disparities in technology-enabled healthcare access, contributing qualitative findings to a broader **mixed-methods research study and future academic publication**.

Southwest Airlines, Dallas, TX,
Technical/Corporate Recruiter, *January 2023- January 2025*

- Recruited and hired **12+ technical and revenue management roles across the U.S.** with a **100% candidate acceptance rate**, ensuring both organizational fit and positive candidate experience.
- **Conducted stakeholder interviews** with **hiring managers** and candidates to identify process pain points, using feedback to **redesign recruitment workflows** and **enhance communication** across teams.
- Designed and implemented **organizational tracking tools** that streamlined the hiring pipeline, improved recruiter efficiency by **25%**, and delivered clearer visibility for team decision-making.
- Partnered cross-functionally with **HR, immigration specialists, and global mobility teams** to **map employee onboarding workflows**, improving usability and compliance for Green Card and immigration programs

Meta, Dallas, TX
Technical Recruiter, *November 2021- November 2022*

- Managed **50+ Software Engineering interns** across 10 U.S. offices, coordinating onboarding, mentorship, and program evaluation.
- Partnered with **sourcing, recruiting, and DEI teams** to integrate **diversity and equity strategies** into internship pipelines, boosting URM representation.
- Delivered a **98% Candidate Review Score (CRS)** by consistently monitoring candidate experience touchpoints.
- Exceeded hiring goals by **130% in the first 6 months**, leveraging data analysis and customized recruiting strategies to improve conversion.

Adobe, Austin, TX
DEI Program Lead and University Talent Sourcer *January 2020- November 2021*

- **Designed and launched Adobe's first Diversity Talent Acquisition team**, establishing scalable DEI recruiting strategies.
- Conducted **qualitative and quantitative research** to identify talent gaps and **presented to the CEO**; findings supported Adobe's **$3M donation to HBCUs/HSIs**.

- Program-managed **career readiness initiative** for 70+ underrepresented students, resulting in **25 internship offers and global adoption** of the model.
- Partnered with design teams to **increase diverse UX design candidates by 200+**, expanding pipelines for product and research roles.
- Created and facilitated **training on diversity hiring and inclusive practices**, attended by **500+ recruiters and hiring managers globally.**
- Designed and delivered a **4-week Career Readiness Program** that exceeded hiring goals by producing eight hires, achieved a **100% participant NPS**, and was scaled for global adoption to increase underrepresented talent.

Google (Onsite through Nelson), Austin, TX,
Recruiting Coordinator and Recruiting Sourcer *August 2017 - March 2019*

- **Reviewed and sourced 800+ applications weekly** across 7+ technical requisitions for Software Engineering Internship programs, generating **200+ offers extended and 100 hires accepted** (50% conversion rate).
- Partnered with diversity teams to expand **HBCU outreach by 40%**, driving a **15% increase in underrepresented minority participation** in the Engineering Practicum program.
- Coordinated **1,500+ interviews** across **17 client groups and 33 offices**, maintaining SLA compliance with **80%+ requests actioned within 24 hours**.
- Received the **Google Champ Award (2018)** for advancing DEI initiatives and enhancing the **candidate experience.**
